

Abdelali El Baz

Software Engineering Student | Systems & Full-Stack

Marrakech, Morocco | elbazness2@gmail.com | +212 6 51 69 61 65 | linkedin.com/in/abdelalielbaz | github.com/abd3l3li

Professional Summary

Software engineering student at **1337 / 42 Network** admitted through a competitive aptitude-based selection process into a multi-year engineering curriculum with proven ability to build production-quality systems in C/C++, full-stack web applications in React/TypeScript, and containerized infrastructure with Docker. Delivered 10+ peer-reviewed projects end-to-end in an agile, collaborative environment. Comfortable using AI-assisted development workflows to ship faster without sacrificing quality. Ready to contribute from day one.

Education

UM6P – 1337 Coding School (42 Network) Oct 2023 – Present

Software Engineering Curriculum multi-year, peer-reviewed, project-based; admitted via competitive aptitude-based selection
All projects validated through rigorous peer evaluations and automated testing (moulinette)

Faculty of Letters and Human Sciences 2021 – 2023

English Studies | Marrakech (2021)

High School Diploma 2021

Marrakech, Morocco

Selected Projects

Real-Time Roommate Finder (Team of 5 React, Tailwind, WebSockets) Feb – Apr 2026

- Built responsive UI screens with real-time features via WebSocket and REST API integration
- Designed UX flows in Figma and coordinated front-end delivery across a 5-person agile team using Git

HTTP/1.1-Compliant Web Server (Team of 3 C++) Jun – Sep 2025

- Built from scratch: request parsing, method routing, CGI execution, and non-blocking I/O with `poll()`
- Validated against real browser and curl clients; handled chunked transfer and keep-alive edge cases

POSIX-Compliant Unix Shell (Team of 2 C) Nov 2024 – May 2025

- Bash-compatible shell: pipes, redirections, heredoc, signals, and 10+ built-in commands
- Zero memory leaks confirmed via Valgrind; correct SIGINT/SIGQUIT behavior throughout

First-Person 3D Raycasting Engine (Team of 2 C, MiniLibX) Dec 2024 – Mar 2025

- Real-time renderer using DDA raycasting with texture mapping, collision detection, and stable frame pacing

Containerized Multi-Service Stack (Solo Docker, Nginx, WordPress, MariaDB) Dec 2025 – Jan 2026

- Deployed isolated Nginx + WordPress + MariaDB stack with custom Dockerfiles, TLS, and persistent volumes

Technical Skills

Languages: C, C++, JavaScript (ES6+), TypeScript, Shell

Web & UI: React, Tailwind CSS, HTML5, CSS3, REST APIs, WebSockets

Systems & Networking: POSIX APIs, HTTP/1.1, Non-blocking I/O, Process & Signal Management

DevOps & Tools: Docker, Docker Compose, Nginx, Git, Linux, Valgrind, VirtualBox, VS Code, Cursor, Antigravity

Practices: Agile Collaboration, Peer Code Review, AI-Assisted Development, Debugging, Memory Safety

Languages

Arabic (Native) | English (Professional Working Proficiency) | French (Basic)
